Professional Summary

Computer Science Engineering student with hands-on experience in Python, machine learning, and web development. Built and deployed applications including a Flask-based recommendation engine and NLP-based classification systems. Strong foundation in data structures, SQL, and data analysis. Seeking a Software Developer / Data Science role to apply problem-solving skills to real-world engineering projects.

Technical Skills

- Programming Languages:** C, Python, Java, SQL, JavaScript
- Web Technologies:** HTML, CSS, Flask
- Data Science / Machine Learning:** Machine Learning, Natural Language Processing (NLP), Deep Learning (LSTM), TF-IDF, Data Analysis, Decision Trees
- Tools & Platforms:** Git, REST APIs (TMDB API)
- Core Competencies:** Communication, Time Management, Teamwork, Problem-Solving

Experience

Embrizon Technologies <i>Data Science Intern</i>	March 2024 – May 2024 <i>Remote</i>
- Built a Movie Recommendation System using Flask and the TMDB API, integrating real-time movie metadata, ratings, genres, and poster retrieval into a functional web application. - Developed a Fake News Detection System applying Natural Language Processing (NLP) and TF-IDF vectorization on text data to classify news articles as real or fake using Machine Learning. - Gained hands-on experience in Python, data preprocessing, model evaluation, and deploying ML models within a web framework.	

Projects

Movie Recommendation System (Flask, TMDB API)	
Developed a machine learning-based web application that recommends movies based on user preferences and displays details, ratings, genres, and posters via the TMDB API.	
AI-Powered Fake News Detection System	
Built a machine learning web application using NLP and TF-IDF to analyze news content and classify articles as real or fake.	
Customer Gender Prediction using Online Shopping Behavior	April 2025
Developed a Decision Tree classification model to predict customer gender from online shopping behavior using a real-world interaction dataset.	
Customer Review Sentiment Analysis using Feature-Level Rating Aggregation	March 2026
Developed a Deep Learning model using LSTM networks to analyze customer reviews and aggregate feature-level ratings for improved sentiment classification accuracy.	

Education

Malla Reddy College of Engineering <i>Bachelor of Technology, Computer Science Engineering</i>	Aug 2023 – 2027 GPA: 8.80 / 10
Narayana Junior College <i>Intermediate (Class XII)</i>	Sep 2021 – May 2023 GPA: 9.76 / 10
Shantiniketan High School <i>Secondary School Certificate (Class X)</i>	2021 GPA: 10.0 / 10

Certifications

- Tata Data Visualisation: Empowering Business with Effective Insights – Job Simulation, Forage
- Deloitte Australia Data Analytics – Job Simulation, Forage
- Introduction to Cybersecurity – Cisco Networking Academy
- Cambridge English Empower B2 Level Course – Cambridge University Press & Assessment
- Getting Started with Artificial Intelligence – IBM
- Generative AI in Action – IBM
- Cloud Computing Fundamentals – IBM
- Career Edge – Young Professional – TCS iON
- AI Prompt Engineering Masterclass – Microsoft

Extracurricular Activities

- Participated in Smart India Hackathon (September 2025)
- Participated in HackWithHyderabad Hackathon, Microsoft Office, Hyderabad
- Completed "Transforming Higher Education with Google Gemini" training workshop, Google Gemini Academy
- Participated in the India AI Impact Buildathon, a national challenge at the India AI Impact Summit 2025
